By the Day of Student Science, the Faculty of Science conducts a webinar about the current trends of e-learning.

April 26, 2017 will be a webinar on the topic: «E-learning for extracurricular and classroom: experiences, features, possibility of using».

The webinar will be of an international nature. Will be attended from the next countries: Armenia, Belarus, Hungary, Kazakhstan, China.

Webinar topics:

- training of students for the use of modern information and communication technologies;
- examples of electronic educational resources, created by students for classroom training, during pedagogical practice and in out-of-class time (during work in student research laboratories, study groups);
- examples of the creation of e-learning with the help of modern tools.

Problem field:

1. Trends e-learning: personalization, automation, mobile learning, augmented reality.

2. Electronic educational resources on the country as a means of teaching intercultural communication.

3. Virtualization of the educational process at the University.

Start: 13: 00 (Minsk time).

Software: Skype.

Working languages: English, Russian.
